

C&L HEREFORD RANCH

Maternal Excellence

SALE

SUNDAY, SEPTEMBER 1, 2024

1 p.m. at the Ranch — Ixonia, Wisconsin

Join us Labor Day Weekend!

110 head sell + the entire Frozen Inventory

Celebrating 51 years of Genetic Progress

...offered in their entirety!

Welcome!

Dear Friends,

Along with my wife, Jill, and our family, I would like to welcome you to our Maternal Excellence Sale.

We are celebrating 51 years raising registered Herefords, and while “dispersal” is in neither Jill’s nor my vocabulary, *we are offering every marketable animal.* You will be able to choose from the core genetics of our herd that was selected and developed around maternal strength and carcass merit. We have tried to breed our females with the intent that *they will have maternal strength, quality type and built-in longevity while having top carcass.* We have performance tested for 50 years, scanned our herd for 30 years and whole herd DNA tested for the last five years. We have enrolled a good number of our herd bulls in the National Reference Sire Test, and our genetics have compared with the best in the breed.

This Labor Day weekend, you will be able to purchase 17G and 14 direct daughters. This family exemplifies our program through and through. You will get to choose from the Haviland progeny—daughters including two year olds, bred heifers and fall-born calf pairs out of this breed marbling elite sire. Salsa, the 2016 HYFA Foundation female, will also be offered in her entirety, along with several daughters and granddaughters as well.

I would be misspeaking if I said that I won’t shed a tear on September 1. This herd has been a large part of our family’s life for 51 years. I would like to thank all of my family and friends who have helped over the last year, as without your help we would not be where we are. These cow families have been developed and bred like we would be keeping them. They are ready to sell. An opportunity like this rarely comes available. Make sure to join us Sunday, September 1.

Thank you for interest and friendship.

Steve and Jill Folkman Family

There are another 100-plus hotels within 1 hour of the ranch in different communities, such as Delafield, Brookfield, Waukesha, Hartford and Madison. This is a holiday weekend, so please book early.

Expected Progeny Differences (EPDs)

EPDs are updated weekly by the American Hereford Assn. The EPDs printed in the catalog are from the 7/15/24 report. Up-to-date EPDs can be viewed online at myherd.org. Most all of the cattle selling have genomically enhanced (GE) EPDs, which are indicated by this symbol:

Note

Announcements made sale day from the auction block will take precedence over statements printed in the sale catalog, advertising or supplement sheet. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time. All persons who attend the sale do so at their own risk. Neither the owners, the sale manager, nor any other person connected with the sale assumes liability, legal or otherwise, for accidents or loss of property.

Wow... 51 years is a long time!

Yes, what started in 1972 with the purchase of some hunting land in the west central Wisconsin community of Blair developed and grew into a family passion of raising quality Hereford breeding stock. Nestled in the oak laden hills and coulees, the C&L Hereford Ranch started and was named after my father, Charles, and mother,

Charles & Lorna Folkman

Lorna, with the original 320 acres and grew to over 1500 acres and 125 registered cows. Rolling pastures, crop fields and hardwood timber formed the ideal site to develop a herd of Hereford cattle and enjoy the benefits from the natural resources and wildlife. Cleaning woodlots, renovating pastures and building fences was a never-ending project those first years.

Purchases from local sales in Wisconsin and surrounding states along with a group of females from Calderon Curran in Grass Lake, Michigan, bred to the RWJ K47 bull formed the start of the cow herd. Herd bulls were acquired from Dave Simmons in Ottawa, Wisconsin, two Kiyiwana New Trend sons from Spring Creek Ranch in Pierpont, Ohio, a double-bred Citation 2T son from John Schultz in Minnesota and a 15G son from Larry Hanson in South Dakota were the basis of the battery in the 70s and 80s.

O! Justa Banner came along with his trifecta of National Champion sons, and a decision was made to purchase semen on Enforcer 107H to infuse his genetics into the herd. Cows were added from Glenkirk Farms in Missouri that were impactful in their productivity and genetic diversity as well. It was at that time when we started double registering our herd in both associations (Hereford and Polled Hereford) prior to the merger. We found that by carefully blending the genetics, we could maintain the strength of the polled cattle in femininity, teat and udder uniformity, phenotype and add guts, rib shape and do-ability while keeping them polled most of the time. This diversified the genetic base of our herd as an additional bonus.

WBF Lady Dom F243 6T

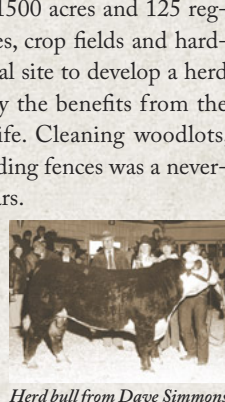

The two cows that put us on the map were 6T and 732Y. In the fall of 1985, we were visiting local breeder Mary Engle at Willow Brook Farm and noticed an exceptional F243 calf out of a tremendous 15G daughter they had exhibited previously. The more I studied this calf, the more I

felt she could potentially develop into a foundation family. I made Mary an offer, and the rest is history. 6T's natural son by BT Butler 452M, Double Time 9B, was a birth weight trait leader. 6T lived to 20 years of age and was responsible for over 20 conventional embryo flushes. 732Y,

C&L Double Time 452M 9B

the high indexing cow in the Saddle Valley Dispersal at Fort St. John, BC, Canada, was found for us by our good friend Dennis Nevin, former Canadian Hereford fieldman. 732Y was bred in the Don Mitchel Klondike herd in Manitoba, Canada. 732Y was behind several top sires in Canada, including Headline and Gangster.

Herd bull from Dave Simmons

BT CL Domino 15G

Enforcer 107H

In 1991, with the death of my father, Charles, we decided to re-locate the herd to our home at Ixonia. I was fortunate at this time to have the many friends in this business to lean on. One friend who is no longer with us, Wallace Lee of Triple L Ranch, gave me a lot of support and advice and was a true mentor.

Wallace Lee

NJW Z17 Vaquero 25C

"Maria"...daughter of Vaquero

NJW Z17 Vaquero 25C was the bull that allowed us to gain international recognition. 25C was used in South America, New Zealand and Australia. This heavily pigmented bull was known for his tremendous daughters. One daughter, "Maria," was a three-time Champion Cow/Calf at the American Royal for us.

DRF C&L Neon 101G was another "unique" national champion that we enjoyed at the last National Focus show in 1998. 101G was the result of using an amp of 40-year-old Kiyiwana New Trend, the breed's first Superior Sire.

DRF C&L Neon 101G

Over the years, our family developed a relationship with the Jensens in Kansas and owned several impactful individuals together, such as J119, the dam of Logic. We had many of the most interesting conversations, going back and forth discussing the merits of individuals to flush these noted cows to for success.

One such mating resulted in the Logic bull that Reed and Journagan had so much success with, and his full sister, KJ C&L Victoria 036R ET, who was Calf Champion at the four major national shows in 2005/06 and was integral in Nicky, Everett and Briana winning the Team Marketing contest at the 2006 JNHE.

KJ C&L Victoria 036R ET

2010 brought the girls more success, as "Corbin" was named Reserve Grand Champion Cow/Calf at the JNHE in Indianapolis. Corbin, the Spearhead Magnum daughter that we purchased in 2007 at Star Lake as a heifer calf, was the first infusion of carcass genetics, and we built a family around her.

It was during my time on the AHA board from 2003 to 2006 that really defined my direction to move our herd's genetic base and improve the carcass merit to elite levels while keeping the traits that we had built this herd around—maternal strength, teat and udder quality, do-ability and phenotypic eye appeal while increasing performance. At our summer board meeting in Montana, I visited the Cooper and Holden herds and was able to purchase an embryo flush on one of Holden's all-time greats, 8037H, the dam of 5139. The planned mating was to "M326," one of the leading carcass sires we owned with Sandhills, Loewen, Knoll Crest and Rogers. Advantage 22S was the first herd sire we bred that defined our direction over the last 20+ years. Carcass strength and maternally strong, 22S developed into a breeding-leading Reference Carcass sire that was additionally a trait leader in the other indexes while being used in the NRSP.

C&L Advantage M326 22S ET

C&L has been fortunate to have owned herd bulls with Kevin Bennet's Sand Rock Ranch the last 10 years, including Emporia, Valiant, Relevant and Haviland, to name a few. While these bulls have defined our direction, they have come from leading programs around the country.

We've developed many relationships and gained many friends over the years from all over North America and abroad while raising livestock as a family. I think Jill and I have gained the most satisfaction in being involved in NHW (*Jill 2014-2018*) and HYFA (*Steve 2007-2024*). Having a part in the development of and building character in young adults has been very rewarding to us. In 2016, we had the fortune of purchasing Salsa, the HYFA Foundation Female. Nicky was able to show her at her 13th and last Expo. Salsa went on to contribute many times over to the Foundation. Earlier this year in OKC, Salsa, through the pick of her heifers, generated \$62,000 for HYFA that will help ensure future success of the NJHA and the Wisconsin Queen program that Nicky has championed and been a mentor for.

Salsa daughters gathered \$62,000 for HYFA and the Wisconsin Hereford Queen program this year.

Celebrating 51 years raising registered Herefords!

- 17G was a feature bred heifer in the 2020 Big League Genetics Sale, selected in partnership by C&L Hereford Ranch and Sand Rock Ranch. Produced in the very progressive Double Seven Ranch program in Oklahoma, 17G consistently produces cattle that marble, have moderate birth and offer maternal excellence.
- 17G herself scanned an actual IMF of 9.29% that adjusted to 9.37% to post an incredible %IMF ratio of 171 in a herd known for producing cattle with IMF. On top of that, she posted a BW ratio of 88 and WW ratio of 102.
- 17G is a prolific producer, with 17 direct progeny plus frozen genetics selling September 1. As you study her progeny, you will see that they are built right from the ground up with stellar EPD profiles. 17G is also unique in that she offers genetic diversity for many programs. The carcass merit is for real, as 23 progeny to date have been scanned to record average ratios of 101 for REA and 101.6 for IMF. Finding donors in their prime that offer calving ease, value-added carcass merit and maternal excellence and that put it all together in a very attractive package is hard to achieve.
- Ranks in the top 2% for CHB; top 3% for Marb; top 4% for BII; top 5% for BMI; top 7% for CW; top 9% for SCF; top 14% for REA.
- Flushed IVF RSF 11 times, producing 77 transferable embryos to average 7. Flushed conventional 10 times, producing 108 transferable embryos to average 10.8.
- Offered with Sand Rock Ranch.
- AI 6/25/24 to Stellpflug Gunsmoke 222 ET.
- PE 6/30/24 to 8/30/24 to EF C&L Big Rig 19Z 36E 220J ET.

- Steve has always been known to think outside the box, and cultivating this mating of 215Z and 17G exemplifies that. Staying true to producing cattle that are moderate at birth and have performance, elite udder quality and strong carcass merit, especially marbling, certainly describes K03. Sired by the Line One proven performance sire 215Z, an AI sire that has certainly left his mark on the industry.
- You have to appreciate K03 for her true mamma cow look and gorgeous udder. Study the numbers, and you are even more impressed. Elite marbling with added muscle in a calving-ease package. True donor potential and checked safe to Merit!
- Ranks in the top 1% for Marb and CHB; top 2% for CEM; top 4% for CW; top 5% for BII; top 7% for BMI; top 12% for Teat.
- AI 5/2/24 to JW 1857 Merit 21134. Checked safe AI.

- **Homozygous Polled.**
- 68H is a feature donor in the offering and is a maternal sister to the Lot 1 feature, 17G. This direct daughter of Loewen Grady, a flush mate brother to Loewen Genesis, is something to spectate in person. She is well balanced from end to end, nice hipped and super cool and feminine through her front 1/3. She was Steve's pick as a featured open heifer in the 2021 Big League Genetics Sale in Oklahoma.
- 68H offers elite calving ease with strong carcass merit. Her natural heifer calf being offered has been the favorite of many visitors this summer. Here's a big-time producer that is just beginning to write her story!
- Ranks in the top 5% for Marb and CHB; top 6% for BW; top 8% for REA; top 12% for MCW; top 13% for CED.
- Flushed IVF with sexed female semen once, producing 6 transferable embryos. Flushed conventional twice, producing 10 transferable embryos to average 5.
- AI 4/6/24 to Stellpflug Gunsmoke 222 ET. Checked safe AI.

- I absolutely love this Thomas County January heifer calf out of 68H and believe her potential is unlimited. When I went through the sale cattle the first week of July, she visually stood out among the natural spring heifer calves. When you study her GE-EPD profile, she certainly does not disappoint, offering calving ease, added performance and elite carcass values, especially REA. Note her REA EPD of +1.04 that ranks in the upper echelon of the breed. Big time female that has a royal pedigree to complement her strong phenotype and elite numerical profile.

- 698K is an outstanding maternal sister to KJ 7603 Element 019L ET, the \$95,000 feature herd sire that sold in the 2024 Jensen Bros. Annual Bull Sale to Fawcett's Elm Creek Ranch, Hickey Bros. and Upstream Ranch. When Steve purchased this female as an open heifer in Jensen's 2022 "Chosen One" Sale, she was the pick of many to become an elite donor. 698K has always been exceptionally well built from the ground up and sound in structure. She combines added power, body and bone with a killer look on the profile and is equipped with a gorgeous udder.
- There is unlimited potential in this royally bred female that has an elite GE-EPD profile to complement her phenotype. Moderate birth with added performance, valued-added carcass merit and excellent maternal. Only when they all sell is a young two-year-old of this caliber offered for sale.
- Ranks in the top 2% for REA and CHB; top 3% for Marb; top 4% for BII; top 5% for CW and BMI; top 6% for CEM; top 9% for SC; top 11% for SCF; top 12% for WW.

- Homozygous Polled.
- The donor known as “Salsa” was the HYFA Foundation Female donated by the Jensen Family at the 2016 NWSS Hereford Sale. She commanded \$80,000 and went to C&L Hereford Ranch, Greenview Polled Hereford Farms and the Rhodes Family. Salsa has since been a tremendous producer of both bulls and females, including several national champions and countless high sellers through the years. Salsa is responsible for over \$600,000 in progeny sales to date, and that figure will continue to increase.
- As you study her progeny represented throughout the book, you can see that Salsa injects added bone, body and power to her progeny while keeping excellent eye appeal. One of the most influential donors at C&L Hereford Ranch, Salsa has certainly left a lasting impression on the program.
- Ranks in the top 12% for WW; top 14% for M&G; top 15% for CW.
- Flushed IVF with sexed female semen 3 times, producing 11 transferable embryos to average 3.67. Flushed IVF RSF 18 times, producing 82 transferable embryos to average 4.56. Flushed conventional 6 times, producing 46 transferable embryos to average 7.67.
- Offered with Greenview Polled Hereford Farms and Rhodes Farm.
- Due early October to SHF Haviland F158 H028.

KJ BJ DWE 686Z SALSA 364C ET

The 2016 Hereford Youth Foundation of America Foundation Female

C&L MISS ZESTY 2296 27M ET

Salsa (Lot 24) generated \$62,000 for the Hereford Youth Foundation of America through the pick of her beifiers as the 2024 Lot 1 HYFA Foundation Female in the Hereford Night in OKC National Sale, held at the Cattlemen's Congress in Oklahoma City. C&L Hereford Ranch, along with Oleson Family Farm, was pleased to donate 100% of the sale proceeds to the Foundation, with 50% benefitting the Wisconsin Hereford Queen fund and the remainder supporting the Junior National Hereford Expo (JNHE) Legacy Fund.

- Big Rig is a surefire calving-ease bull, with his first 14 progeny posting an average BW ratio of 95.1. He is dark red, short marked and very attractive on the profile. His progeny are really consistent and will be very marketable. A direct son of the time-tested, proven donor for Atkins Herefords, Rumbler 19Z.
- Ranks in the top 3% for BW; top 4% for CED, Milk, CEM and BMI; top 5% for BII; top 6% for SCF; top 7% for CHB; top 8% for REA; top 9% for M&G; top 12% for Teat.
- Offered with Everhart Farms.
- Selling full possession and full semen interest. Sells with 100 units of semen.

At 1 p.m., Sunday, September 1, we are offering every marketable animal in the C&L herd. You will be able to choose from the core genetics of our herd that was selected and developed around maternal strength and carcass merit.

We have tried to breed our females with the intent that they will have maternal strength, quality type and built-in longevity while having top carcass. We have performance tested for 50 years, scanned our herd for 30 years and whole herd DNA tested for the last five years. We have enrolled a good number of our herd bulls in the National Reference Sire Test, and our genetics have compared with the best in the breed.

- In the fall of 1985, we were visiting local breeder Mary Engle at Willow Brook Farm and noticed an exceptional F243 calf out of a tremendous 15G daughter they had exhibited previously. The more I studied this heifer calf, the more I felt she could potentially develop into a foundation family. I made Mary an offer, and the rest is history. "Ole T" lived to 20 years of age and was responsible for over 20 conventional embryo flushes. A natural son of 6T by BT Butler 452M, Double Time 9B was a birth weight trait leader, with 344 progeny recorded at an average BW ratio of 98.4.
- Selling full semen interest. Includes 2,225 units that qualify for Canada.

C&L DOUBLE TIME 452M 9B

WBF LADY DOM F243 6T
Dam of Lot 79

Steve & Jill Folkman Family

This herd has been a large part of our family's life for 51 years. Over the years, C&L genetics have won industry leading bull tests and state, regional and national shows around the United States. We believe in utilizing all industry tools and focus on economical traits to develop cow families that make up our herd, such as structure, feet, legs, udder and teat composition including disposition to increase longevity and indirectly add value to our program. Thank you for your interest and friendship!
